

Junior Technical Project Manager (Client-Facing)

Rhode Island, USA

Robosys Automation is a global leader in **AI-powered maritime autonomy**, delivering solutions that transform conventional ships into autonomous vessels. With teams across the UK, USA, Canada, and India, we're driving the future of smart shipping.

As a **Junior Technical Project Manager**, you'll work closely with clients and internal teams to deliver projects from proposal to deployment. This is a hands-on role where you'll translate client needs into actionable plans, support software development processes, and take part in **real-world sea trials with autonomous vessels**.

What you'll do

- ✓ Be the main point of contact for clients
- ✓ Manage project schedules, budgets & risks
- ✓ Draft Functional & Software Requirements (FRDs & SRS)
- ✓ Support testing, risk assessments & compliance
- ✓ Collaborate with Sales, Engineering, QA & Operations

What we're looking for

- 1–3 years' project management experience (tech/engineering/software preferred)
- Strong client-facing and communication skills
- Knowledge of FRDs, SRS, and project workflows
- Interest in **maritime, robotics, AI, or autonomy**

Why Join Robosys?

- Be part of a pioneering company shaping the future of maritime autonomy.
- Gain hands-on experience in real-world sea trials with autonomous vessels.
- Collaborate with global teams of experts across engineering, AI, and operations.
- Contribute to building safer, more efficient, and sustainable maritime solutions.

Compensation & Benefits

- Competitive salary based on experience and Rhode Island market rates
- 401(k) retirement plan
- Comprehensive health benefits

Additional Information

- This position is only open to candidates who are permanently authorised to work in the United States.

How to Apply

- Email your CV with a covering letter to Yuliia.Betskykh@robosysautomation.com
